

Appln No.: 10/075,947
Amendment Dated: February 4, 2005
Reply to Office Action of October 4, 2004

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1-10. (canceled)

11. (previously presented) T cells expressing a recombinant single chain peptide comprising the variable region of the light chain of an anti-G_{D2} antibody linked to the variable region of the heavy chain of an anti-G_{D2} antibody, wherein the recombinant single chain peptide is encoded by a polynucleotide comprising a region encoding the variable region of the light chain of an anti-G_{D2} antibody linked to a region encoding the variable region of the heavy chain of an anti-G_{D2} antibody, wherein the variable region of the light chain is linked to the variable region of the heavy chain in an orientation whereby a peptide expressed from the polynucleotide binds to G_{D2}.

12-22. (canceled)

23. (previously presented) T cells according to claim 11, wherein the polynucleotide comprises, in contiguous sequence, the bases identified in SEQ. ID NO: 1.

24-28. (cancelled)

29. (previously presented) T cells according to claim 11, wherein the polynucleotide comprises, in contiguous sequence, the bases identified in SEQ. ID NO: 2.

30. (previously presented) T cells according to claim 29, wherein the polynucleotide further encodes a therapeutic or pre-therapeutic moiety.

31. (previously presented) T cells according to claim 30, wherein the pre-therapeutic moiety is a pro-drug converting enzyme.

32. (previously presented) T cells according to claim 30, wherein the pre-therapeutic moiety is streptavidin.

33. (previously presented) T cells according to claim 30, wherein the therapeutic moiety is a toxin.

34. (previously presented) T cells according to claim 23, wherein the polynucleotide

further encodes a therapeutic or pre-therapeutic moiety.

35. (previously presented) T cells according to claim 34, wherein the pre-therapeutic moiety is a pro-drug converting enzyme.
36. (previously presented) T cells according to claim 34, wherein the pre-therapeutic moiety is streptavidin.
37. (previously presented) T cells according to claim 34, wherein the therapeutic moiety is a toxin.
38. (previously presented) T cells according to claim 11, wherein the polynucleotide further encodes a therapeutic or pre-therapeutic moiety.
39. (previously presented) T cells according to claim 38, wherein the pre-therapeutic moiety is a pro-drug converting enzyme.
40. (previously presented) T cells according to claim 39, wherein the pre-therapeutic moiety is streptavidin.
41. (currently amended) T cells according to claim ~~39~~ 38, wherein the therapeutic moiety is a toxin.
